General Information

Pre-health students are planning for careers in medicine, dentistry, pharmacy, physician assistant, optometry, physical/occupational therapy, veterinary medicine, public health, and nursing. Pre-health students can study any major as long as they also complete professional school prerequisites (see Pre-requisite Comparison Chart for the Health Professions). Admission is determined by many factors; it is important to balance academic excellence with clinical, research, service, and leadership experiences.

Advanced Placement (AP) Credit

Most health professional schools accept AP credit; check each medical school’s website to review specific prerequisites. Do not enroll in courses for which you will receive AP credit as no units will be earned.

Health Beat at the Career Center | healthbeat.ucsd.edu

Explore health professions and prepare for the application process through participation in events, workshops, and pre-health advising. Register as Pre-Health/Pre-Med to receive important email updates.
